Figure 1-2: Select Printer

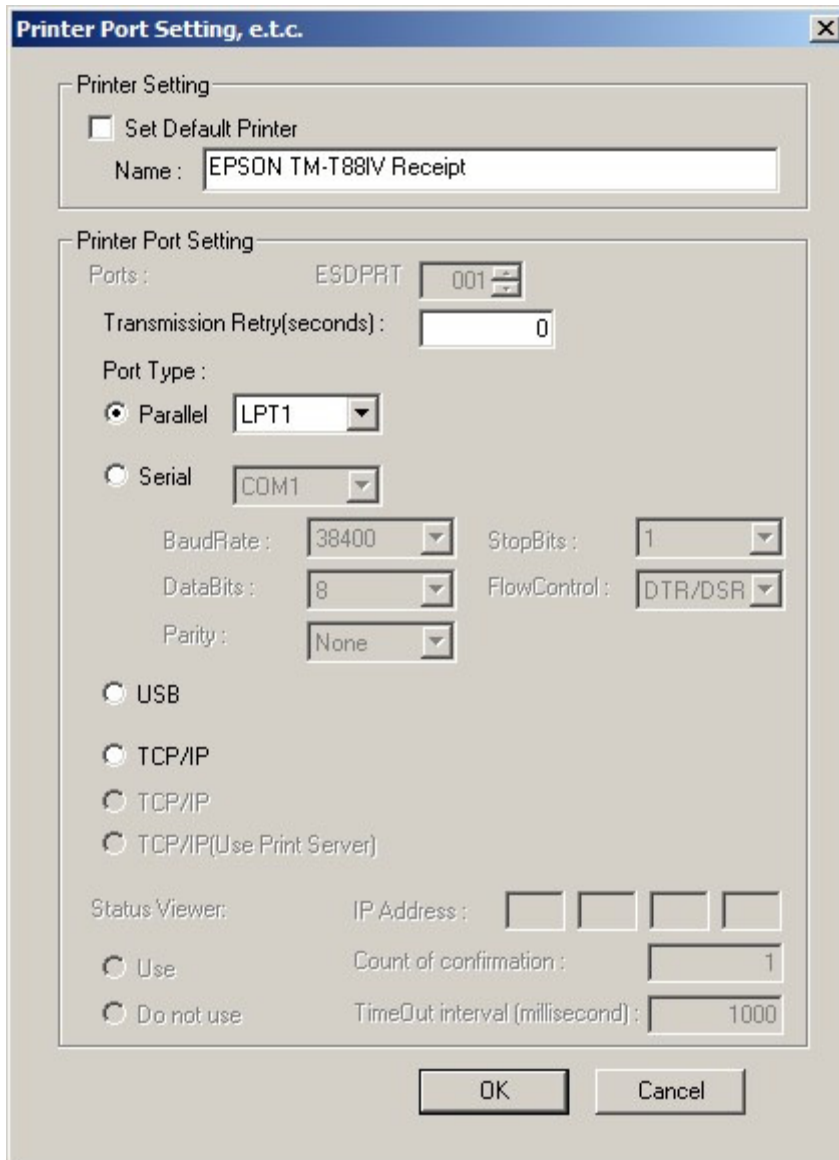

2. Printer Port Settings

Figure 2-1: Set Printer Port Settings.

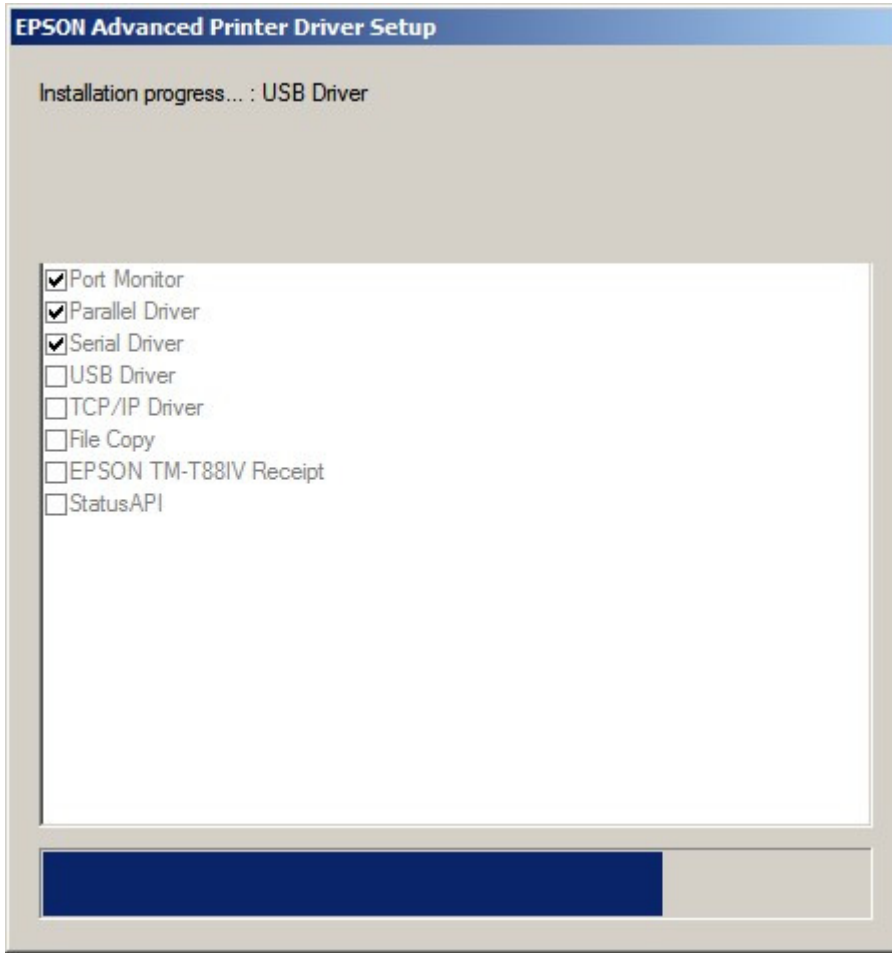

Most new POS printers are **USB**.

Please make sure you select the correct type of Port for your printer.

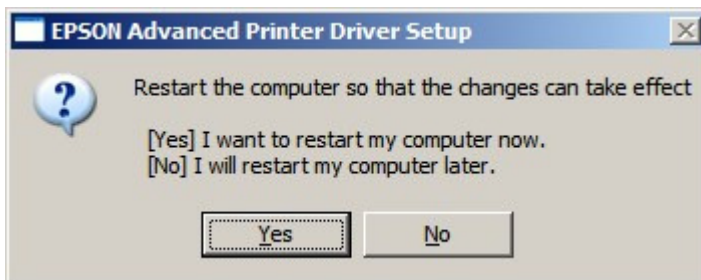

The printer will now be installed.

Figure 2-2

You may need to restart your computer for the printer driver to load and port configuration changes to take effect.

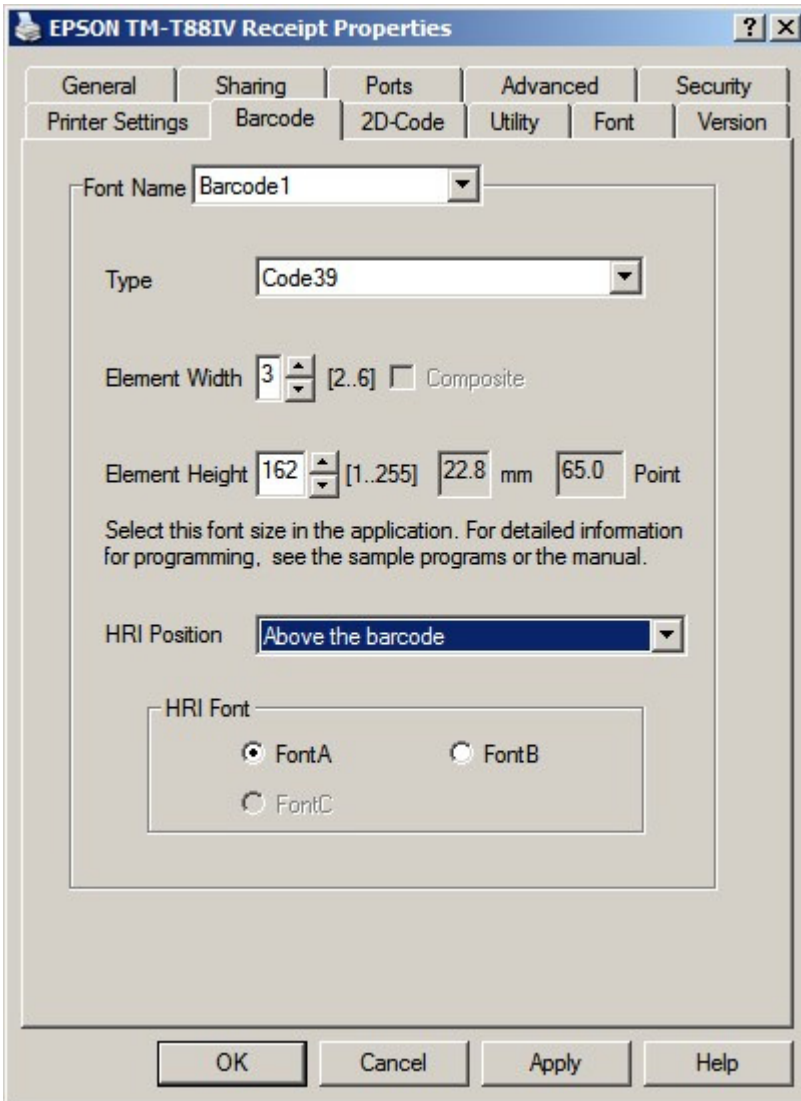

Figure 2-3

3. Barcode configuration
